THE KEAN MILLER

# SURVIVAL GUIDE for Louisiana

Brought to you this Holiday Season by the highly cultured,  
fun-seeking, cracker-jack team of attorneys  
at Kean Miller.

*Laissez les bon temps rouler!*

Dear friends:

December 2002

Another holiday season is upon us—a time for celebration and reflection, family and friends, and giving and receiving. As we at Kean, Miller, Hawthorne, D’Armond, McCowan & Jarman reflect on the blessings of the past year, we are also looking ahead. And the future is bright.

We are grateful that you have provided us with the opportunity to serve you, our clients and friends, for almost 20 years. In fact, we will celebrate our 20th anniversary on February 14, 2003. For those of us who were there at the beginning, that is still somewhat difficult to believe.

From the 12 original attorneys in 1983, the firm has grown to become Baton Rouge’s largest law firm with more than 100 attorneys practicing in the firm’s five South Louisiana offices.

We are proud of the services we have provided, and we are proud to call Louisiana home. It is a unique place—full of sights, sounds and tastes for which mere words will never be adequate. This guide is a compilation of recommendations from our attorneys of their favorite attractions, accommodations and culinary delights in our state. We hope this guide will allow you to more fully appreciate the gifts Louisiana has to offer.

Have a safe and happy holiday, and best wishes for this and every holiday season. Remember, in South Louisiana, we’ll use any excuse to “pass a good time”—Christmas, Chanukah, New Year’s, Mardi Gras, St. Patrick’s Day, Cinco de Mayo, the Fourth of July, and Saturday nights in Tiger Stadium.

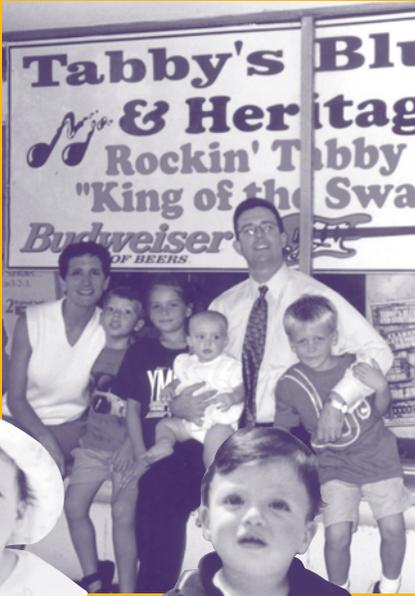

*From our family to yours,*

The attorneys and staff of Kean, Miller, Hawthorne, D’Armond, McCowan & Jarman, L.L.P.

## I. BATON ROUGE AND SURROUNDING AREAS

Since the earliest Spanish explorations, events and the passage of time have secured Louisiana's reputation. The culture, politics, cuisine, legal system, religion and language are unique and just a little out of the ordinary. Louisiana natives take pride in that reputation and history.

On April 9, 1682, Rene-Robert Cavelier, sieur de La Salle, claimed the lands drained by the Mississippi River for France and named the territory Louisiana in honor of King Louis XIV. La Salle's attempt to establish a colony in Louisiana ended in mutiny and murder in 1687. More than a decade later, Pierre Le Moyne, sieur d'Iberville, and his younger brother Jean Baptiste Le Moyne, sieur de Bienville, left France to establish a colony on the Mississippi River.

As Iberville and Bienville traveled up the Mississippi River in 1699, they came upon, as legend has it, a cypress pole made red with animal's blood.<sup>1</sup> The red cypress pole divided the hunting grounds of two tribes, the Bayou Goula and the Houmas. Upon their map, Iberville marked the spot "*le baton rouge*," French for "red stick." The French, however, did not settle Baton Rouge until 1722.

By the time of the American Revolution, the Spanish had control of the Louisiana territory. Though the Spanish supported the colonists in their fight against Great Britain, Louisiana was relatively unaffected by the fighting or outcome. When the United States purchased the Louisiana territory from France on May 2, 1803, Baton Rouge was not a part of that territory. Baton Rouge, part of West Florida, was still a Spanish possession. Seven years later, a group of American settlers met to create a representative government and led an armed rebellion against the Spanish forces in Baton Rouge. After the Spanish forces left, the new independent republic wrote to President James Madison requesting annexation by the United States. In 1812, Louisiana became the 18th state to join the Union.

The legislature moved the capital to Baton Rouge in 1846, though the capital was briefly returned to New

Orleans during the Civil War and Reconstruction (1864-1879). It would be many years, however, before Baton Rouge was anything more than a small, rural town.

A key factor in the growth of Baton Rouge was Louisiana State University. The school that became LSU was founded in 1860 as Louisiana State Seminary of Learning and Military Academy. The original campus was not in Baton Rouge, but Pineville, in central Louisiana, and the first superintendent was William Tecumseh Sherman, the Union general famous for his march to the sea. After the war and a disastrous fire at the Pineville campus, the school was moved to Baton Rouge in 1869 and renamed Louisiana State University a year later.

No visitor can escape the reach of Huey P. Long, even almost 70 years after his assassination. As is true with every larger-than-life figure, the myths that have grown up around him are so numerous and pervasive that it is sometimes impossible to distinguish myth from fact. It is only fitting that the stories of Huey P. Long have survived and become a part of the culture. Legend has it that Long got the Legislature to give him the funds to build Tiger Stadium by telling them it was a dormitory, which just happened to have a football field in the middle. On many occasions, Long would lead the LSU band onto the football field. He built the 34-floor state capitol building and would not allow any building to surpass it.

One of the most important developments for the economy and growth of Baton Rouge was the discovery of oil in 1901 followed by the arrival of Standard Oil Company in 1909. Following WWII, the growth of the petrochemical industry, the port facilities and state government have allowed the city to grow and prosper.

At the beginning of the 21st century, Baton Rouge is a big city that has managed to maintain the feel and hospitality of a smaller town. Kean, Miller, Hawthorne, D'Armond, McCowan & Jarman has called Baton Rouge home for 20 years. Its success, in large measure, has resulted from the growth of the Baton Rouge economy, the firm's expertise in matters involving state government and regulations, and from its experience representing the interests of the petrochemical and oil and gas industry.

### 3. DeAngelo's Pizzeria Company | Baton Rouge | (225) 757-3877 |

“This wonderful pizzeria serves irresistible calzones, salads and pizza. They use only the freshest and finest produce and ingredients. One taste of their grilled chicken Caesar salad and you'll know what I mean.” **LINDA PEREZ CLARK**, BUSINESS TRANSACTIONS

### 4. DiGuilio Brothers Restaurant | Baton Rouge | (225) 383-4203 |

“Small, but wonderful neighborhood Italian restaurant with consistently delicious menu items and specials. Be prepared for a wait on Friday and Saturday nights. It can be a bit noisy then, too. Entrees are served with salad and pasta side dishes. Spaghetti G.O.P. (garlic, olive oil and parsley) is a sure bet. Great pizza, but first try the veal, seafood, and Italian dishes served Louisiana style. Start off with a beer; it's always cold!” **DWAYNE JOHNSON**, ENVIRONMENTAL LAW

### 5. Gino's Restaurant | Baton Rouge | (225) 927-7156 |

“Relax with a few drinks in the piano bar before enjoying an authentic Sicilian dinner. Be sure to save room for a piece of homemade cheesecake and a ‘white swan,’ Gino's signature after-dinner drink.”

## 6. LSU Football Games | LSU Tiger Stadium | Baton Rouge |

“Every true sport fan’s list of ‘must-see’ venues should include Saturday night at LSU Tiger Stadium. The notoriously rowdy LSU fans really put on a show under the lights of the 90,000+-seat stadium. If you have time, stroll through LSU’s beautiful Italian Renaissance-style campus with its massive live oak trees.”

**LEN KILGORE**, LITIGATION AND ENVIRONMENTAL LAW

“92,000 screaming fans, sausage and chicken sizzling on the BBQ pit, propane burning under a pot of boiling crawfish, hundreds of imposing oak trees with leaves rustling in the wind, the pounding drums of the Golden Band from Tigerland and the LSU Fight Song: these are the sights and sounds of the LSU football experience.”

## II. NEW ORLEANS, NORTH SHORE AND RIVER ROAD AREA

**M**ost people, whether or not they have ever been to New Orleans, have very specific ideas about the city, called by many the only European city in the United States. The Big Easy. The Crescent City. Bourbon Street and Mardi Gras. Jazz music. Dirt, grime and corruption. And the food. New Orleans is all that and more.

Vital to the French government's plan to make Louisiana prosper was a city on the banks of the Mississippi River. In 1718, settlement of the town of New Orleans had begun.<sup>1</sup> Two years later, engineer Adrien de Pauger laid out the French Quarter's distinct rectangular street plan. New Orleans became the capital in 1721 and soon thereafter the economic center. In an attempt to increase the population, the government advertised throughout Europe. This was instrumental in forming New Orleans' reputation as a true American "melting pot."

The influence of French and Spanish rule was important in the cultural development of New Orleans. The culture, religion and society established by the French and Spanish in Louisiana shared little with that of the neighboring British colonies. Many of the French governors maintained a formal court in New Orleans. While Catholicism was the state religion of both France and Spain, religious faith and morality did not inform the colonists' lives in Louisiana as the Protestant faith had in the British colonies. Perhaps there is no better symbol of this fundamental difference than Mardi Gras—a religious holiday that became an excuse for balls, revelry and an active nightlife.

The final decades of the 18th century marked the arrival of large numbers of immigrants. While many of these immigrants did not stay in New Orleans, they did pass through the city influencing its cuisine and culture. The Creoles were born in Louisiana, the descendants of the early French and Spanish aristocratic settlers. Though culturally elite, the Creoles absorbed many of the distinct culinary traits of the new arrivals.<sup>2</sup> French cuisine may have been the initial template; however, the Spanish contributed their spices, the Germans their sausages and meats, the Italians their pastries, the Haitians their exotic vegetables and slow cooking, the Native Americans

their local and new ingredients, the Africans their okra, and the Acadians their *beignets*. In the strictest sense, a true melting pot.

When the United States purchased Louisiana from France in 1803, the people spoke a different language and practiced a different religion. They had no experience with democracy and wanted nothing to do with the imposition of civil duties. The Creoles remained a powerful force in New Orleans for many years. Though the capital was moved to Baton Rouge in 1846, New Orleans remained the economic and cultural center of Louisiana for the wealthy planters that lived in plantations along the Mississippi River.

Wartime has also proved to be a unique experience in New Orleans. The Battle of New Orleans, one of the United States' most lopsided victories, was fought two weeks after the peace treaty ending the War of 1812 had been signed. Then, during the Civil War, General Benjamin Butler and his Yankee soldiers occupied New Orleans. The ladies of the city showed no respect for the soldiers, which led Butler to issue his infamous order. Any woman showing contempt for any soldier would be arrested and tried as a “woman of the town plying her avocation.”

Over the years, New Orleans has remained separate and apart from the rest of the state and the country. It is a ride down St. Charles on the streetcar, the oldest continuously operating railcar line in the United States. It is Café du Monde, open since 1862, serving *beignets* and *café au lait* 24 hours a day, 7 days a week. It is the Martin brothers, owners of Martin's neighborhood restaurant, providing the striking street car operators with “poorboy” sandwiches in 1929.<sup>3</sup> It is Louis Armstrong and jazz music, a unique blend of black folk songs, brass band marches and ragtime; Mardi Gras, parades and king cake; great food and drinks; voodoo and Marie Laveau; cemeteries, the celebration of life and jazz funerals; and red beans and rice on Mondays.

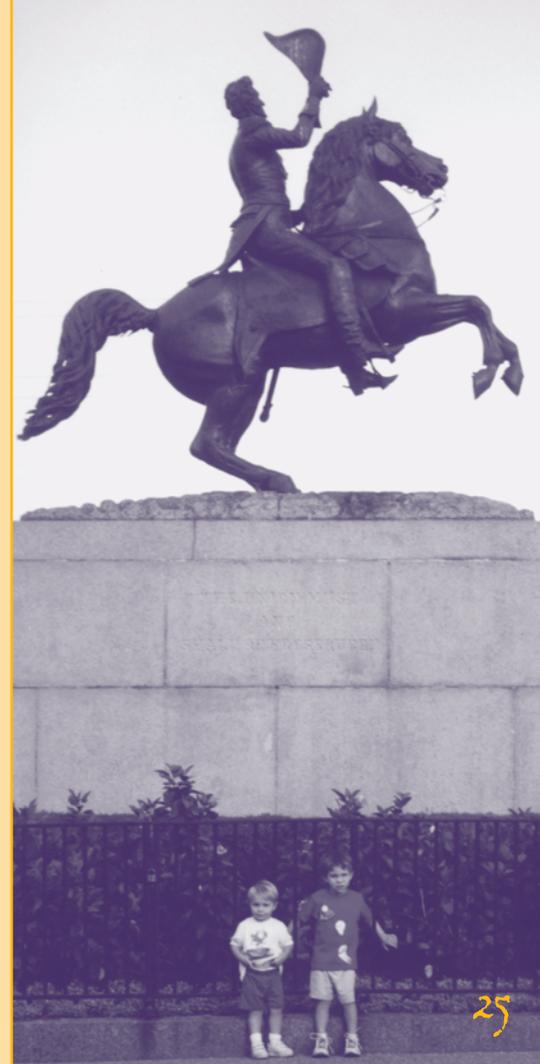

Here, food is not mere sustenance; it is a way of life. It is not part of an occasion; it is the occasion. Visitors are always welcome, and criticism is never taken to heart. And life is to be lived and enjoyed. Even in death, many

natives have been known to return, unable to sever their ties with the life of New Orleans.

The New Orleans branch of Kean Miller opened in 1991. The Covington office on the north shore of Lake Pontchartrain followed in 1999. These offices help Kean Miller provide expanded service for its industrial and commercial clients in the Greater New Orleans area.

### III. SOUTH CENTRAL LOUISIANA

Welcome once more, my friends, who so long have been friendless and homeless,  
Welcome once more to a home, that is better perchance than the old one!  
Here no hungry winter congeals our blood like the rivers;  
Here no stony ground provokes the wrath of the farmer.  
Smoothly the plowshare runs through the soil as a keel through the water.  
All the year round the orange-groves are in blossom; and grass grows  
More in a single night than a whole Canadian summer.  
Here, too, numberless herds run wild and unclaimed in the prairies;  
Here, too, lands may be had for the asking, and forests of timber  
With a few blows of the axe are hewn and framed into houses.  
After your houses are built, and your fields are yellow with harvests,  
No King George of England shall drive you away from your homesteads,  
Burning your dwellings and barns, and stealing your farms and your cattle.<sup>1</sup>

**T**he history and culture of south central Louisiana will forever be tied to that of the French Acadians.<sup>2</sup> The Acadians had settled in Acadie, modern-day Nova Scotia, in the 17th century. These descendants of French peasants were farmers and fishermen. In 1713, the French ceded their lands in Canada to Great Britain. When the Acadians refused to take an oath of allegiance to the British crown, the British government decided to distribute the Acadians among the American colonies. So began “*Le Grand Derangement*,” the expulsion of approximately 7,000 French Acadians from Nova Scotia in 1755. Many Acadians soon followed, not waiting to be physically torn away from their homes and families.

The Acadians were destitute, and many families had been separated by the time they reached the American colonies. Because of these conditions, their arrival was not welcomed in most of the colonies. Louisiana was not

one of the intended destinations, but slowly the Acadians made their way South to a place where the Spanish government's reception was warm and the language was more familiar. Because of the cool welcome by the wealthy planters and Creoles in New Orleans, the Acadians continued to move up the Mississippi River looking for the right place to begin anew. Ten years after leaving their homes in Canada, the Acadians made a new home west of the Mississippi River along the bayous in south central Louisiana, near present-day Lafayette. Henry Wadsworth Longfellow was so enthralled by the story of the Acadians and the tragic separation of Emmeline Labiche and Louis Arceneaux that he used their story as the basis for his famous 1847 poem, *Evangeline*.

The culture, music and cuisine brought to South Louisiana by the Acadians have survived and flourished to this day. The Cajun way of life is unique and quite special and a result of their struggles in the bayous of Louisiana. Their cuisine was born of their fight to survive. Everything that they hunted, fished and picked went into their black iron pots. Today Cajun cuisine is much the same as it was more than 200 years ago. The music and dancing came from the joy of surviving each day, each test. While Cajun music and dance have made it out of the bayous, it all started in these small rural communities. At the end of another long day, it was time to relax with good food, good friends and good music.

Next time you're down this way go to the *fais-do-do*, work up an appetite dancing to the foot-stomping music of fiddles and accordions, and enjoy food the likes of which you have never seen and could never spell—jambalaya, gumbos, fricassees, andouille and boudin. Guests are always welcome as long as they remember three simple rules: work hard, play hard and never burn the roux.

The Lake Charles office of Kean Miller was established in 1997 in order to provide its expertise to industrial and commercial clients in Southwest Louisiana. In addition, the office offers a wide range of services for individuals and business interests, such as commercial transactions, acquisitions, mergers, tax and estate planning.

## IV. LAGNIAPPE

**Lagniappe** (n): a small present given to a customer with a purchase, a gratuity or the like.<sup>1</sup>

Look in any dictionary, and you will find this definition. Something, however, is missing. They have removed what made the word special, unique. And, in the process, deprived the word of its *joie de vivre*. If you ask a native of South Louisiana, perhaps you will get a little *lagniappe* with the definition.

The tradition of giving a little something extra can be traced back to the French Canadians, or Acadians, who began to arrive in Louisiana in the 1770s.<sup>2</sup> In the 18th century, precise weights and exact measurements were impossible. For the poor French peasants, every crumb, every morsel was important to their survival. Each and every piece of grain that slipped through the holes or got caught in the mesh of the woolen sack, *nappe* in French, was a cruel joke.

In less secure times, these humble people—the forefathers of Louisiana’s Cajuns—cared about more than their own survival. The survival of one meant less without the survival of all. And so began the practice of giving a little something extra.

When the French peasants purchased grain in their woolen sacks, the seller might throw in a little extra free of charge to make up for the lost grain—“*C’est pour la nappe.*” Not because it was his fault, rather it was good for business and for the peasant families. True *lagniappe* must be given with a smile and without expecting something in return. In honor of this still-vital practice, the following section on Natchitoches is *pour la nappe*.

## NATCHITOCHEs (pronounced NAK-a-tush)

In the early 18th century, the French were disappointed by the lack of return on their monetary investment in Louisiana. So began France's brief experiment with the British proprietary model for colonial government. The proprietor, Antoine Crozat, Marquis de Chatel, needed his colony to prosper. Antoine de la Mothe Cadillac, the first man to carry the title of governor of Louisiana, knew he had to increase trade and commerce. Less than a year after his arrival, Cadillac began the exploration and settlement of the interior.

To prevent encroachments by the Spanish, Louis Juchereau St. Denis was sent inland and established a military post, St. Jean Baptiste, on the Red River in 1714. Located near the Natchitoches Indians, the settlement became known as Natchitoches – the oldest European town in modern-day Louisiana. The town prospered through trade with the Indians and, thanks to St. Denis, illegal trade with Texas and New Spain (Mexico). Because of its location on the Red River, Natchitoches was a major port and commercial center of the antebellum South.

Then in 1839, a spring flood changed everything. Natchitoches survived, but the Red River's course had changed — leaving behind a port city with a stream but no river. As a result, Natchitoches was saved from becoming the loud, bustling big city it might otherwise have been. It is a town that time forgot. Or chose to pass by, leaving that remnant of our past as its gift.

**3. Melrose Plantation** | (318) 379-0055 |

“Located south of Natchitoches in the Cane River National Heritage Area, this plantation is without equal in historical significance. Marie Therese Coincoin, a former slave, built Yucca, the original house which still stands on the grounds of Melrose Plantation. Yucca was built in 1796. She and her children, whose freedom she purchased, ran the plantation. The African House, a stunning and rare example of African architecture in the South was built in 1800. The ‘Big House’ as it is known, was built in 1833. Clementine Hunter, a Melrose cook, is Louisiana's most famous folk artist. Some of Clementine's best work lines the walls of the African House.”
